LET US MEET YOUR CHALLENGE

ECOLOGICALLY RESPONSIBLE

Ecological and economical, we are a meeting point of knowledge, research, ideas, effort and exchange

INNOVATION

• Constant Quest for new surprising materials for current and new applications
• A game of challenges and efforts

ADDED VALUE

Educating and assisting, after care, return packaging, cooperation with innovation centres and students, education

CUSTOMER SUPPORT IN SUSTAINABLE, PROFITABLE PRODUCTS TO REACH OPTIMAL RESULTS

COÖPERATION, HONEST BUSINESS RELATION AND QUALITY

HIGH QUALITY ACCORDING TO EUROPEAN STANDARDS

RESPECT AND RESPONSIBILITY

The philosophy, mission, products, personnel: All Bases of the PM-Group can be summarized in 2 close connected words with different meaning: Respect and Responsibility

RESPECT

• Wishes and Needs of Customers
• The people and their natural environment
• All employees who forms the company

RESPONSIBILITY

• Solutions which join customer needs
• Welfare of human being and its environment
• Development of employees

Please join us on a voyage of discovery in a world of precision and accuracy.

PM, manufacturer of linear bearings of an extremely high quality. Years of experience, development and research have made PM today’s world leader in the highest grade of precision technology. The progressive quality, customer-oriented solutions and fluidity are one of the main features of this success. We produce, in our state of the art production facilities, highly qualified linear and rotational bearings, high-end systems and system integration. Working together with customers to find highest level solutions is where we meet our tradition.

Our Service is to Serve
Our business is very simple. We focus on the needs of our customers, we offer and supply the right products at the right price and on time without hassle. At PM we are very close to our customers. Our engineers are on call to serve you with their expertise and innovative ideas. Our manufacturing is like your own factory; we have many partnerships with our customers to create the products in our operation. But service means more for us. Like:

- island structure; our facilities are surrounded by water like truck traffic;
- stock of tools and products at the right place;
- clean room facilities according to standard ISO-5 and ESD safe assembly areas;
- local technical and sales support.

We know exactly what you need to realize your accuracy goals. A good base in just a good start. Our operations offer many benefits to increase the quality such as for example:

- island structure; our facilities are surrounded by water channel to dampen the vibrations from outside activities like truck traffic;
- every work floor is like a island in the building to prevent influence from other machine departments;
- optimum infrastructure to reduce internal transport times and cost;
- stock of tools and products at the right place;
- clean room facilities according to standard ISO-5 and ESD safe assembly areas;
- ISO-certified according to DIN-ISO-9001.
